Art Unit: 2829

**1. Restriction/Election**

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 33 and 58 -72, drawn to the apparatus and the method for testing an IC on a wafer, classified in class 324, subclass 754.
- II. Claims 34 -57, drawn to the structure of the test circuit, classified in class 324, subclass 765.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because both the inventions have different functionality. The subcombination has separate utility such as using this test circuit can perform the test on different designs (schematic of a circuit or a logic device).

4. A telephone call was made to Stephen M. Beney on 4/2/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2829

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
